

# Gu Index

Gu are listed alphabetically by the path they belong to.

## Blood Path

*Blood path Gu often cost little to feed and are easy to refine, though many recipes require slaughter at huge scales. Its attack methods are brutal, and Blood Path is considered one of the strongest offensive paths. Hundreds of thousands of inheritances were left by a Rank 7 Gu Immortal, Blood Sea Ancestor, all over the Gu world. The righteous path shuns the evil and demonic methods of blood path, and many practitioners live imprisoned in Tie clan's demon suppression tower.*

*It's worth noting that an ordinary human has about 5 liters of blood in their body.*

### Blood Battle Gu

*One of the lesser inheritances of the Blood Sea Ancestor contains Blood Battle Gu. Repeated use can cull a whole battlefield.*

*Rank 5 Attack*

Cost: 150 portions

Range: 100 meters

Health: 48

Food: A 100,000 liter pond of human blood in a hole dug in Hemorrhage Soil

Effect: You rupture the hearts of all *bleeding* creatures within range. They have a chance to react before they instantly die. Immediately following, make 3 attack rolls for each creature affected. The range of these attacks is 15 meters, measured from the original target or the square they were in when they died. On a hit, deal 80 rending damage. If damage is dealt to a creature's hit points in this way, they gain *bleeding 5*. If the damage kills the target, you may make an additional 3 attack rolls with the same properties and measured from the square the target was in when they died.

### Blood Blade Gu

*Rank 3 Attack*

Cost: 4 portions

Range: 3 meters

Health: 22

Food: 3 liters of blood

Effect: Your body shudders as a hundred wounds appear all over it. You take 8 unmitigatable rending damage directly to your hit points, and your blood streaks out like swords; all creatures within range must attempt a **Dodge** skill test. They take 100 rending damage on a failure, and 50 on a success. If damage is dealt to a creature's hit points in this way, they gain *bleeding 2*.

### Blood Brother Gu

*Rank 3 Carver*

Cost: 35 portions

Range: 1 meter

Health: 13

Food: 1 liter of mixed blood either from siblings or a parent and their child

Effect: Select a creature within range. As long as both you and them have an open wound, your blood twists and mingles in the air before shooting into each other's veins. You and the target are now permanently considered siblings by blood path methods.

### Blood Demon Flower Gu

Cost: 35 portions

Range: Self

Health: 21

Food: 50 liters of blood Keywords: [**Dao**], [**Sustained**], [**Transformation**]

While sustained, you gain the following effects:

Your maximum hit points are 250.

Your movement is reduced by 2 meters.

As a bonus action, you can burrow your roots into a corpse and consume its blood to regain 30 hit points.

When you use a combat action to make an unarmed melee attack, instead of striking with your fists you may extend your roots and attack up to 5 times. Your root attack range is 5 meters, and your root attacks deal 50 rending damage. If damage is dealt to a creature's hit points in this way, they gain the *bleeding 3*.

At the end of each of your turns, make a **Perseverance** attribute test with a +20 penalty. On a failure, you gain a **Blood Demon Flower Token** and your body becomes corrupted. If you ever have 10 **Blood Demon Flower**

Keywords: [Expendable]

Effect: Target a [Beast] within range. This Gu flies from your aperture in a straight line towards the target. This action is reactable and the Enslavement Gu can be hit with attacks while en route. If the Enslavement Gu successfully reaches its target, you attempt to dominate its mind, as long as the target's beast classification is at or below the rank of the Enslavement Gu:

- Rank 3: Thousand Beast Kings
- Rank 4: Myriad Beast Kings and Mutated Beasts
- Rank 5: Beast Emperors and Mutated Hundred Beast Kings

You can now control its actions with your mind from a distance of up to (Maximum Soul) meters, as long as you can see it.

If the target is willing to be enslaved, they fail the battle of souls automatically and your soul takes no damage.

If your current soul value is less than or equal to the beast's, you fail to enslave it, the beast's current soul value is reduced by your current soul value, and then your current soul value is reduced to 1.

You have one fewer reaction each turn from focusing on two sets of visual data.

### Bonded Collar Gu

*A collar made of wispy shadow, it's hard to see exactly where it begins or ends. Once accepted by a creature, an ethereal leash flickers out from the user's hand and ties itself to the collar before both fade and disappear. After creating a false aperture in this way, False Aperture Gu can no longer be activated until it is fed.

### Houndmaster Hivemind Gu

Cost: 15 portions

Range: {6, 12, 25} meters

You may pick the target for targeted effects.

Cost: 40 portions

Range:

Health:

The headless corpse rises from the dead as a Roaming Zombie (see Bestiary) under your control. The Roaming Zombie can perceive its surroundings in a 10 meter radius despite not having eyes, but permanently has the *deafened* condition. It can also not make **Bite** attacks.

You may control the Roaming Zombie in the same way as other enslaved creatures. If you do not directly control the Roaming Zombie, it wanders about its surroundings and attacks any creatures besides you that it comes across.

### Pack Leader Gu

*Rank 2-5 Attack*

Keywords: [**Expendable**]

Effect: Touch a Gu Master of rank {1, 2, 3, 4, 5} or less. You both have a battle of souls. If your current soul value is greater than the Gu Master's, subtract the Gu Master's current soul value from your own and you successfully permanently enslave them. You can now directly control their

actions with your mind from a distance of up to (Maximum Soul) meters, as long as you can see them. They are still the same person, retaining their memories and general personality, but become wholly devoted to you, willing to do whatever you command to the highest possible standard. While directly controlling them, you can choose to take the target's turns for them; otherwise they act in whatever way they think is most helpful to you.

If the target is willing to be enslaved, they fail the battle of souls automatically and your soul takes no damage.

If your current soul value is less than or equal to the Gu Master's, you fail to enslave it, the Gu Master's current soul value is reduced by your current soul value, and then your current soul value is reduced to 1.
